NovaRetail IT Support Handbook - Part 2

Version 1.0 - Fictional document for chatbot testing

6. Office Wi-Fi

Employees connect company laptops to the NOVA-CORP network, which signs in automatically with the device certificate. Personal phones and guests use NOVA-GUEST; the guest password changes every Monday at 07:00 and is posted at reception. NOVA-GUEST is limited to 20 Mbps and blocks access to internal systems. If NOVA-CORP shows 'No internet', forget the network, reboot, and reconnect. If it still fails, the device certificate may be expired: open a ticket with category 'Network'.

7. Email and Phishing

Use the 'Report Phishing' button in Outlook for any suspicious email. Never forward the suspicious email to colleagues. Each mailbox has a 50 GB limit; you receive a warning at 45 GB. Emails in Deleted Items are purged after 30 days. Shared mailboxes are requested through the Software Portal and must have a named owner.

8. Printing

Office printers use secure print: send your document to 'NovaPrint-Secure', then tap your badge on any printer within 24 hours. Unreleased jobs are deleted after 24 hours. Color printing is limited to 200 pages per month per employee. For paper jams or empty toner, contact Facilities at extension 3300, not IT.

9. Meetings and Video Calls

Meeting rooms are booked through Outlook. Each room has a NovaRoom touch panel; press 'Join' to start the scheduled call. If the room screen stays black, press the HDMI button on the panel and wait 30 seconds before calling IT. External participants can join without an account using the guest link. Recordings are kept for 90 days.

10. File Storage and Backup

Work files must be saved in NovaDrive, not on the laptop desktop. NovaDrive syncs automatically and keeps file versions for 60 days. Deleted files can be restored by the employee from the NovaDrive recycle bin for 30 days; after that, IT can restore them for up to 90 days. USB storage drives are blocked on company laptops.

11. Personal Devices (BYOD)

Personal phones can access company email only through the NovaMail app after enrolling in device management. Enrollment requires a screen lock with at least 6 digits. If a personal phone is lost, IT will wipe only the NovaMail app, never personal data. Personal laptops are not allowed on NOVA-CORP.

12. Monitors and Docking Stations

Hot desks have a NovaDock station with two monitors. If monitors stay black, unplug the USB-C cable for 10 seconds and plug it back in. Docks need laptop firmware 3.2 or higher; check under Settings > About. Extra hardware such as keyboards or headsets is requested from the hardware catalog and

delivered within 5 business days.

13. Leaving the Company

On the last working day, return the laptop, badge, charger and any security keys to the IT desk on floor 2 before 17:00. Accounts are disabled at 18:00 that day. Do not wipe or reinstall the laptop yourself; IT performs a certified wipe after return.

14. Ticket Priorities and Response Times

Priority	Example	First response	Resolution target
P1 - Critical	Site-wide outage, ransomware	15 minutes	4 hours
P2 - High	Whole team cannot work	1 hour	1 business day
P3 - Normal	One user, workaround exists	4 hours	3 business days
P4 - Low	Question or hardware request	1 business day	5 business days

15. Contact IT Service Desk

Phone: extension 4400 | Email: servicedesk@novaretail.example | Hours: Monday to Friday, 08:00-19:00. Outside these hours, P1 incidents only via the on-call line, extension 4499.
